

Clause 1 - Coverage

Assets under an active warranty are covered for parts and labour on inverter control-board (PCB) and compressor failures. Coverage makes the repair a free replacement; no quote or payment is raised.

FieldFlow Warranty Policy v4 - page 1

Clause 2 - Out-of-warranty path

If warranty is expired or void, the control-board replacement is chargeable: a quote is raised for PCB-492 plus labour, and payment is collected before the visit is confirmed. Consumable filters are never covered.
