

## **Clause 1 — Coverage under active warranty**

Assets under an active warranty are covered for parts and labour on the covered components listed per model. Coverage makes the repair a free replacement; no quote or payment is raised.

## **Clause 2 — Out-of-warranty and out-of-scope path**

If the warranty is expired or void, or the fault is outside the originally reported issue, the replacement is chargeable: a quote is raised for the part plus labour, and payment is collected before the visit is confirmed.

Clause 3 — Consumables (filters, gaskets, belts, lamps, anode rods) are never covered. Clause 4 — A quote at or above the high-value threshold pauses for operator approval before it is sent to the customer.
